## Introduction

PERIBOARD can create flexible, convenient and wireless working environment with its design. It offers a reliable 2.4GHz frequency penetration, low interference, and omni-directional signal transmissions with 10 meters receiving distance.

PERIBOARD is an ideal solution for home and office needs. It is easy to install and use with Digital Multimedia Applications such as Media Center PC, Home Theater PC, Internet TV, and Car PC.

## System Requirements

- Operative system: Microsoft Windows ME/2000/XP/Vista/7
- 1x Free USB port

## CAUTION!

To avoid permanently damaging the keyboard, you must install the batteries with the positive and negative terminals being on the correct direction. Instructions can be found within the battery compartment.

## Installation Process

The following steps initiate a connection process of the PERIBOARD to your PC.

## 1.

Turn On the PC.

## 2.

Insert 2xAAA Batteries

## 3.

Plug the receiver into a free USB Port

## 4.

The device will be automatically detected by the PC, and it should be ready to work

## 5.

Press the "Connect" button on the receiver to make it ready to receive

## 6.

If the device is still not working, please repeat the process from step 1

## 7.

If the device is still not working, please repeat the process from step 1

## 8.

If the device is still not working, please repeat the process from step 1

## 9.

If the device is still not working, please repeat the process from step 1

## 10.

If the device is still not working, please repeat the process from step 1

## 11.

If the device is still not working, please repeat the process from step 1

## 12.

If the device is still not working, please repeat the process from step 1

## 13.

If the device is still not working, please repeat the process from step 1

## 14.

If the device is still not working, please repeat the process from step 1

## 15.

If the device is still not working, please repeat the process from step 1

## 16.

If the device is still not working, please repeat the process from step 1

## 17.

If the device is still not working, please repeat the process from step 1

## 18.

If the device is still not working, please repeat the process from step 1

## 19.

If the device is still not working, please repeat the process from step 1

## 20.

If the device is still not working, please repeat the process from step 1

## 21.

If the device is still not working, please repeat the process from step 1

## 22.

If the device is still not working, please repeat the process from step 1

## 23.

If the device is still not working, please repeat the process from step 1

## 24.

If the device is still not working, please repeat the process from step 1

## 25.

If the device is still not working, please repeat the process from step 1

## 26.

If the device is still not working, please repeat the process from step 1

## 27.

If the device is still not working, please repeat the process from step 1

## 28.

If the device is still not working, please repeat the process from step 1

## 29.

If the device is still not working, please repeat the process from step 1

## 30.

If the device is still not working, please repeat the process from step 1

## 31.

If the device is still not working, please repeat the process from step 1

## 32.

If the device is still not working, please repeat the process from step 1

## 33.

If the device is still not working, please repeat the process from step 1

## 34.

If the device is still not working, please repeat the process from step 1

## 35.

If the device is still not working, please repeat the process from step 1

## 36.

If the device is still not working, please repeat the process from step 1

## 37.

If the device is still not working, please repeat the process from step 1

## 38.

If the device is still not working, please repeat the process from step 1

## 39.

If the device is still not working, please repeat the process from step 1

## 40.

If the device is still not working, please repeat the process from step 1
